Resolution for Full-time Teaching Load

Faculty Senate
April 12, 2005
Resolution

Effective beginning Fall semester 2005, the requirement of at least 9 courses taught in a 10-month contract be changed to at least 8 courses taught in a 10-month contract.

Teaching 9 courses and 30-32 hours is unfeasible in the math department given the distribution of 3 and 4-hour sections
This illustrates why the Math Department has entirely different workload issues than, for example the English Department.
Note that all faculty must teach 32 hours to come close to approximating the actual sections offered.
Math Department – Spring 2005
Proposed Solution

Average of 30-32 hours, 8-9 courses

Actual sections offered
Average teaching mix
