Course Tools displays as a menu on the left side of the instructor, designer, and student views. It can be customized to include custom links and links can be removed or hidden. The Course Tools menu can also be collapsed.

The Course Content link is used to return to the “home page” of the course.

Click on a link such as Assessments will display all the assessments that are available for you to edit or allow you to create new items. This is true for many of the links you find on the Course Tools menu.
