Participants: Thomas Cooper, Larry Powell, Larry Coty, Ashraful Chowdhury, Emily Whaley, Jeff Gutliph

During this first year as Mathematics 2420- Discrete Mathematics, the committee rolled over to a third edition of *Discrete Mathematics with Applications*, by Susanna Epp. The committee discussed and created a teaching guide for the new text. The committee also revised and updated the common course outline to reflect the new course name, number, and prerequisites.

During the Spring semester, the committee discussed the end of the year report and possible charges for next year. These include continuing to review and consider updates to the teaching guide and common course outline as the course is taught from the newer text.

Respectfully submitted,

Thomas Cooper
