Student Activities 2005-2006

1) Campus – Dunwoody

2) Math Club

The Math Club had several meetings this year and conducted study sessions for the AMATYC test and the Gainesville Competition.

3) How do you recognize your outstanding math students?

We have a student of the semester ceremony twice a year recognizing one student from every math course with the highest average.

4) What activities besides the AMATYC SML test, does your department have for students? For example, calculator workshops, question of the month contest, special speakers, field trips.

We offer calculator workshops, as well as MyMathLab and Eduspace workshops for those using the software. We also have special speakers with the F. Lane Hardy series and a field trip to the Gainesville Competition where we place every year.
